

Testimonial - Dr. Advait Vaidya (Batch 2007)

It is a privilege to be an alumnus of Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar. The institution has been instrumental in building a strong academic base and shaping my clinical outlook in medicine.

The college continues to advance under the able leadership of Dean Dr. Sunil Natha Mhaske and Director Dr. Abhijit Diwate, whose vision and commitment to excellence in medical education and patient care have greatly strengthened the institution's standing.

The expansive campus set amidst natural surroundings offers a peaceful and encouraging environment that supports focused learning and professional development. Such a setting fosters both academic discipline and personal growth among students.

One of the most valuable aspects of the institution is its experienced and supportive faculty, who provide constant mentorship and guidance. Their dedication to teaching and clinical training plays a vital role in developing competent and confident medical professionals.

The hospital also benefits from a substantial and varied patient load, enabling students to gain extensive clinical exposure and practical experience in managing a wide spectrum of medical conditions. This hands-on training significantly enhances clinical skills and decision-making abilities.

Additionally, the well-equipped hospital infrastructure and organized healthcare services ensure quality patient care while simultaneously providing an excellent platform for clinical learning.

The institution also maintains a secure and well-managed campus environment, ensuring safety and a disciplined atmosphere that allows students to concentrate fully on their academic and professional responsibilities.

My time at this institution was immensely enriching. The knowledge, clinical experience, and values gained here continue to guide my professional journey. I remain sincerely thankful to the institution for the opportunities and strong foundation it provided.

Dr. Advait Vaidya

MCH Oncosurgery

Batch – 2007
