

Testimonial – Dr. Arsheen Wadekar (Batch 2007)

It is truly an honor to be counted among the alumni of Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar. My years at this institution were instrumental in shaping both my academic understanding and professional outlook in the field of medicine.

The institution has consistently progressed under the distinguished leadership of Dean Dr. Sunil Natha Mhaske and Director Dr. Abhijit Diwate. Their forward-looking vision and commitment to excellence in medical education and healthcare delivery continue to strengthen the institution's reputation as a center for quality training and patient care.

The beautifully planned campus, enriched with natural surroundings, creates an atmosphere that is both inspiring and conducive to learning. Such an environment allows students to remain focused while also encouraging personal and professional growth.

A defining characteristic of the institution is the presence of highly competent and dedicated faculty members who guide students with patience and enthusiasm. Their mentorship and clinical expertise played a significant role in developing a strong academic base and practical clinical approach.

The hospital's large and diverse patient population provides students with extensive clinical exposure, enabling them to encounter a wide range of medical conditions and develop valuable hands-on experience. This exposure significantly contributes to building confidence and clinical competence.

The institution is also supported by well-developed medical infrastructure and organized healthcare services, which facilitate efficient patient care while offering students a structured environment for clinical learning.

Equally important is the institution's focus on maintaining a secure, disciplined, and supportive campus environment, backed by effective administration and security measures that ensure a comfortable atmosphere for students and faculty.

Reflecting on my time here, I remain deeply appreciative of the education, guidance, and experiences that this institution has provided. The strong foundation built during my training continues to influence my professional journey and commitment to healthcare.
