

Testimonial – Dr. Kalyani Boralkar (Batch 2007)

I feel honored to be associated as an alumna of Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar, an institution that played an important role in shaping my academic and professional journey in healthcare.

The institution continues to advance under the able stewardship of Dean Dr. Sunil Natha Mhaske and Director Dr. Abhijit Diwate, whose commitment to academic excellence and quality healthcare delivery has strengthened the institution's standing as a center of medical learning and service.

The well-maintained campus enriched with natural surroundings offers a serene and inspiring environment for students. Such a setting fosters concentration, curiosity, and the motivation to pursue excellence in both academic and clinical domains.

A defining feature of the institution is its experienced and approachable faculty, who consistently support and mentor students throughout their training. Their guidance, encouragement, and clinical insight greatly contributed to building a strong foundation in medicine and research-oriented thinking.

The hospital's substantial and varied patient inflow provides students with meaningful clinical exposure and practical learning opportunities. This interaction with diverse clinical cases plays a vital role in strengthening diagnostic reasoning and patient-centered care.

The institution also offers well-developed healthcare infrastructure and organized medical services, ensuring efficient patient care while creating an excellent environment for clinical education and professional development.

Equally important is the institution's emphasis on maintaining a safe and disciplined campus environment, supported by effective administration and security systems that ensure a supportive atmosphere for students and staff.

Reflecting on my academic journey, I remain grateful for the knowledge, training, and professional values I acquired at this institution. The experiences gained here continue to influence my work in the field of clinical research and healthcare.
