

Testimonial – Dr. Rohan Kharde (Batch 2004)

It is a matter of great pride for me to be an alumnus of **Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar**. The institution has played a significant role in shaping my academic foundation and professional growth.

Under the able leadership of **Dean Dr. Sunil Natha Mhaske** and **Director Dr. Abhijit Diwate**, the institution continues to maintain high standards of medical education, patient care, and academic excellence. Their vision and commitment towards the development of the institution create a strong and inspiring environment for students and healthcare professionals.

One of the most remarkable features of the institution is its **spacious and naturally enriched campus**, which provides a calm and motivating atmosphere for learning. The environment supports both academic development and personal growth of students.

The college is supported by **highly experienced and dedicated faculty members** who are deeply committed to teaching and mentoring students. Their guidance, knowledge, and clinical expertise play a vital role in strengthening the academic and clinical competence of students.

Another major strength of the institution is the **excellent patient load**, which offers extensive opportunities for hands-on clinical exposure. This rich clinical experience greatly helps students develop practical skills and confidence in managing diverse medical conditions.

The hospital infrastructure is **well-developed, modern, and patient-centered**, with well-organized departments and advanced diagnostic facilities. The institution constantly works towards upgrading its facilities to ensure quality healthcare services and effective clinical training.

Additionally, the institution ensures a **safe, secure, and disciplined environment** for students, faculty, and patients through well-maintained campus security and supportive administrative systems.

My journey at this institution has been extremely enriching, and I remain grateful for the strong academic and professional foundation it provided.

Dr. Rohan Kharde

MD Oncology

Batch – 2004
