

## Testimonial – Dr. Sana Shaikh (Batch 2007)

I am honored to be associated as an alumna of Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar, an institution that played a key role in shaping my academic journey and professional outlook in medicine.

The institution continues to grow under the dynamic leadership of Dean Dr. Sunil Natha Mhaske and Director Dr. Abhijit Diwate, whose commitment to strengthening medical education, clinical services, and institutional development has contributed greatly to the progress and reputation of the college.

The well-planned campus surrounded by natural greenery provides an encouraging and peaceful atmosphere for students. Such an environment fosters concentration, academic curiosity, and a sense of discipline that is essential for medical training.

A major strength of the institution is its dedicated and highly competent faculty, who consistently support students through academic learning and clinical training. Their guidance and encouragement helped build confidence, strong fundamentals, and professional values among students.

The hospital offers excellent clinical exposure through its significant patient inflow, allowing students to gain hands-on experience and practical skills in managing a wide variety of medical conditions. This experience plays a vital role in developing clinical competence and patient-centered care.

The institution also maintains well-developed hospital infrastructure and organized healthcare systems, ensuring efficient patient care while simultaneously creating a strong platform for medical education and clinical training.

Furthermore, the campus emphasizes a safe and secure learning environment, supported by effective administrative and security arrangements that help students focus on their academic and professional growth.

Reflecting on my time at the institution, I remain deeply grateful for the knowledge, experiences, and professional values I gained there. The strong foundation built during my training continues to guide my journey in the medical profession.
