

Testimonial – Dr. Varun Gupta (Batch 2007)

My association with Dr. Vithalrao Vikhe Patil Foundation's Medical College & Hospital, Ahilyanagar remains one of the most important foundations of my medical career. The training and experiences I gained during my time here played a significant role in shaping my professional outlook and clinical approach.

The institution continues to progress under the able guidance of Dean Dr. Sunil Natha Mhaske and Director Dr. Abhijit Diwate, whose dedication to academic advancement and healthcare excellence has strengthened the institution's reputation and growth over the years.

One of the distinctive features of the institution is its well-planned campus surrounded by natural greenery, which creates a peaceful and conducive environment for academic learning and personal development. Such surroundings greatly contribute to maintaining focus and discipline among students.

The college is supported by highly experienced and committed faculty members, whose mentorship and teaching played a vital role in building a strong academic and clinical foundation for students. Their constant encouragement and clinical guidance helped develop critical thinking, confidence, and professionalism.

Another significant strength of the institution is its substantial patient load, which provides invaluable clinical exposure and hands-on experience. This opportunity to interact with a diverse patient population is essential in developing practical medical skills and clinical judgment.

The hospital is equipped with well-established infrastructure and organized healthcare facilities, enabling efficient patient care while simultaneously serving as an excellent platform for clinical training. Such facilities ensure that students gain meaningful experience in a structured and professional healthcare environment.

Equally important is the institution's emphasis on maintaining a secure and disciplined campus environment, supported by effective administrative systems and proper security arrangements, ensuring a safe and supportive atmosphere for students and staff.

Reflecting on my time at this institution, I remain deeply appreciative of the education, guidance, and opportunities it provided. The strong academic foundation and clinical exposure I received here continue to influence my professional journey and practice.

Dr. Varun Gupta

Consultant Anaesthesia, United Kingdom

Batch – 2007
